MSF Compact series

Compact, fast, precise

The **MSF Compact** combines precise 2D laser cutting with a compact design. This space-saving version of MicroStep's fiber laser machine is available in **work areas of 1,000 x 2,000 mm, 1,250 x 2,500 mm and 1,500 x 3,000 mm** and is particularly attractive thanks to its small footprint in combination with the genuinely high cutting quality. A manually extractable cutting table enables easy and straightforward loading.

MSF Compact machines are available with state-of-the-art fiber laser sources with a power range **1 – 4 kW**. The machines are perfect for production of highly accurate parts at high cutting speeds, with a small footprint and low maintenance and operational costs. Their high dynamics is achieved by a low-seated gantry, digital AC drives and precise planetary gears.

Your solution for fast and precise cutting

- A powerful, compact laser cutting machine for cutting a wide variety of materials
- High precision and accuracy of parts and contours
- Excellent dynamics thanks to a robust machine design, low-seated gantry, digital AC drives and precise planetary gears

Robust, dynamic, and long-lasting machine design

- Gantries with extremely high torsion resistance enable high traverse speeds
- Compact, manually extractable cutting table for convenient loading of sheets up to 15 mm thick
- Bellows on all axes protect the guideways from contamination (optional)

Excellent cutting quality

The compact version of MSF achieves excellent cutting quality on a variety of cut parts thanks to high-quality of used components. An advanced sensor system inside the cutting head ensures reliable performance in single- as well as multi-shift operations.

High economic efficiency

- 2/3 lower power consumption and higher cutting speeds (compared to CO₂ laser of the same power)
- The complete machine is nearly maintenance-free
- No laser gases necessary
- Extremely small footprint
- No warm-up time, after switching on immediately ready to work
- Fast commissioning thanks to its compact design (Plug & Produce)

Compact machine with manual loading and unloading

The MSF Compact is available with work areas of 1,000 x 2,000 mm, 1,250 x 2,500 mm and 1,500 x 3,000 mm and is particularly attractive thanks to its small footprint in combination with the genuinely high cutting quality. A manually extractable cutting table enables easy and straightforward loading.

High-quality components

MicroStep relies exclusively on high-quality components from established manufacturers to ensure long-lasting and accurate results. Thus, laser sources from IPG Photonics with a power of up to 4 kW are available. For high cutting speeds, an automatic laser cutting head from the German manufacturer Thera-cut is used.
