Performance Data

All data is based on the engine operating with a fuel system, water pump, lubricating oil pump, air cleaner, and alternator. The compressor, fan, optional equipment, and driven components are not included. Data is based on operation at SAE standard J1394 conditions of 300 ft. (91.4 m) altitude, 29.61 in. (752 mm) Hg dry barometer, and 77 °F (25 °C) intake air temperature, using No. 2 diesel fuel only.

| Altitude above which output should be limited*: | 300 ft. (91.4 m) |
|--|------------------|
| Correction factor per 1000 ft. (305 m) above altitude limit: | 3% |
| Temperature above which output should be limited: | 77 °F (25 °C) |
| Correction factor per 10 °F (11 °C) above temperature limit: | 1% (2%) |
